

Dear colleagues and friends,

Up to now, the biggest challenge in allogenic transplantation is to understand and manage the immunology of graft-versus-host and graft-versus-tumor reactions. Fascinating new technologies like CAR-T cells or the use of post-transplant cyclophosphamide open new avenues to broaden therapeutic responses. The GvH/GvL meeting was first organized by Hans-Jochem Kolb in 1994 and it has since been a tradition of this meeting held every two years that the latest achievements are monitored, discussed and put yet another step forward.

It is a great pleasure and honour for us to continue this meeting series and host it in the historical city of Regensburg. Therefore, it is our pleasure to announce the next GvH/GvL meeting 2020, which will be held from March 4th to 6th at the University Hospital in Regensburg and cordially invite you to join us in March 2020.

As in the previous meetings we aim to have two days of intensive interaction to discuss and develop up-to-date concepts within a small group of invited speakers, chairs and discussants. In addition, we are pleased to inform you that the prestigious Hans Jochem Kolb award will be granted again, and we cordially invite young researchers to submit their latest results (see attached information). Please feel free to pass this information also to your colleagues who might be interested

As the number of participants is strictly limited to 200, we kindly ask you to register as soon as possible. We sincerely hope to welcome you for the next GvHGvL meeting in Regensburg

Yours sincerely

Ernst Holler, Matthias Edinger and Wolfgang Herr
